*“A **Front-end Developer** developing web apps with HTML technologies, and now **React**, for more than **8 years**”*

SUMMARY

A **Front-end Developer** based in Dubai, who has built responsive applications powered by **ES 2015+/TypeScript** and **SASS/CSS** which works across platforms and devices as **Single-page Web Apps & Hybrid Mobile Apps with Cordova**. Have past experience in **Backbone.js**, **Angular**, **AngularJS**, **jQuery** and **Bootstrap** as Front-end frameworks. Currently learning **React & Redux** by making a secret Progressive Web App around Movies.

SKILLS

- Interactive UIs using **with ES 2015+/TypeScript**
- Getting Experience in **React & Redux** with a Side Project
- **Backbone.js**, **Angular (v2)**, **Bootstrap**, **jQuery** & **Cordova**
- **SASS** and **CSS**
- **RESTful Services Development** using **PHP** in early career
- **Git** as Version Control System

EXPERIENCE

Property Finder as a **Front-end Developer**

May '17 – March '19 (1 Year 11 Months)

Worked as a **Front-end Developer** on one of the partner applications which is used to obtain leads and convert leads to customers for real estate properties.

The product was built as a **Responsive Web-app on Backbone.js**, and also had a **Hybrid Mobile Application using Cordova**, allowing agencies to work across platforms.

Apart from my profile as a Front-end Developer, I was also part of the team who has worked on integrating **third-party services like Cronofy and Firebase** - for real-time database and push notifications - which has resulted in simplified architecture of Back-end services.

CodeArray Technologies Pvt. Ltd. as a **Consultant Front-end Developer**

May '16 – May '17 (10 Months)

Worked as a **Front-end Development Consultant** for technical refresh of a Medical Facility Management System and modernize its tech.

I played a **key role in making team competent in Angular**, starting development while it was still in beta stage and integrate it with other frameworks like **Bootstrap**. I have also setup **Continuous Deployment process**. As an experienced developer, I have also helped the team doing API design and implementing best practices.

Prorigo Software Pvt. Ltd. as a Sr. Software Engineer

September '13 – April '16 (2 Years, 6 Months)

I've joined Prorigo as a PHP developer for working in Terapeak, an e-commerce analytics product, on its [PHP-based UI Layer](#). Later, I've worked on a sibling project, MMI, a [single page application](#), where the UI was created using JavaScript and HTML technologies. This project has given me opportunity for my [transition to be a UI developer](#) working solely on HTML technologies along with libraries and frameworks like [JQuery](#), [Bootstrap](#), [Nunjucks](#) etc. Moving further as a UI Developer, I worked on an interactive application built with [Angular and SVG](#), for a real estate project, and also helped teams on JavaScript implementations on other projects.

PIXML Solutions as a Software Engineer

June '12 – April '13 (11 Months)

Worked in this startup as a [PHP Web Developer](#). Here I have worked on applications involving Facebook Graph API, created a custom CMS based on [FuelPHP](#), worked on a data visualization and reporting application on RESTful architecture. I have also done a project involving Magento theming and created a [custom eCommerce application](#) using knowledge gained by working on Magento.

Avinashi Systems Pvt. Ltd as a Software Engineer

September '09 – March '12 (1 Year, 6 Months) -

May '12 – April '13 (11 Months)

Worked here as a [Lead PHP Developer](#), handling server-side pie for some of the prominent products of Avinashi. I've worked on vast varieties of projects here - from back-end only services to the mix of UI and Server-side projects. I've also [made a customized CMS](#) for Avinashi that was used for creating many websites, quickly.

EDUCATION

First Class in B.E. with Computer Science

From Veer Narmad South Gujarat University, Surat, India.

Grade: First Class | Year of Passing: **2009**

SOME KEY PROJECTS I'VE WORKED UPON,

I've worked as a part of team as either a front-end developer, a PHP developer, or both!

- **Interactive Project Navigator for Real Estate Developers**

This application was about letting end users to navigate through different projects of a Real Estate developer using interactive areas, created with SVG, overlaid on maps and photos. It also has an administration interface from where admin can add new projects and annotate images for different interactions. AngularJS (v1) was used as base of the Front-end, for both end user application and administration interface, and SVG was used for providing visual annotations and interactions.

- **Terapeak & MMI** (*eCommerce Analytics*)

Worked as a PHP and UI developer in an eCommerce analytics products that give its users some insights on how they are selling! Using these applications users can compare how their products are performing in comparison with other similar products and sites. This project has provided me opportunity to move in to modern UI development space with emerging HTML Technologies.

- **Anant Platform** (*A simple Backend as a Service*)

Worked as a key developer in a project that eliminates the need of a back-end programmer, way back before Parse was there! It provided the UI developer with a simple cross-platform API which can be used to easily work with custom-designed 'objects' and 'collections'. This project was made in PHP using FuelPHP framework and MongoDB as database.

Other than these projects, I have enjoyed working on other smaller projects giving me chance to experiment with new frameworks or third party APIs.

PERSONAL

Full Name	MITALI TANMAY PATEL
Birth Date	18 th July, 1988 (Current Age: 31)
Address	Discovery Gardens, Dubai, UAE .
Marital Status	Married
Nationality	Indian
Online Presence	http://in.linkedin.com/in/khundiwalamitali

I hereby declare that the above-mentioned information is correct.
